Our Story

Let's face it: Cork is Cool.
That's why we created the Corkology™ line.

We have been manufacturing since 1947 (3rd generation) and working with cork for nearly 50 years. We've taken the great eco-properties that cork inherently offers, and applied elegant and clean design principles to make it shine. Consumers are now looking for affordable "sustainable" accessories that are made in the USA. That's where we come in.

Everything we design and supply we make just outside of Chicago. Being sustainable doesn't have to equal being expensive. It's our philosophy that the more reasonable the price, the more people will become sustainable.

I hope you enjoy our designs and join us in the most important movement on earth: Sustainability.

Evad Flor,
President/Designer

THE CORK STORY

Cork has been used ever since it was discovered by the Greeks and the Romans more than 1,000 years ago. It comes from a unique oak tree growing naturally throughout the Mediterranean region—and has properties that man still can't reproduce.

IT'S SUSTAINABLE.

Cork trees are harvested every nine years by carefully peeling the outer bark from the tree. The bark regenerates to produce hundreds of pounds of cork throughout the tree's 150-year life cycle.

IT'S PLENTIFUL.

There's enough cork in Portugal alone to meet global demand for centuries to come. Countries in the Mediterranean, Asia and North Africa are also cultivating cork.

IT'S RECYCLABLE & BIODEGRADABLE.

Cork products are 100% recyclable and completely biodegradable, which reduces waste in landfills.

IT'S SUPPORTIVE.

Cork forests support entire ecosystems around the globe that are home to many endangered species and offer jobs for local workers. In Portugal alone, cork forests provide employment for more than 100,000 people.
